15th September 2025

Dear Councillor,

You will recall I sent you reports on Park/Carcur in February, the 4th July and 16th December 2024.

You will be aware that construction is ongoing for the construction of a new railway overbridge at Park adjacent to the Faythe Harriers All Weather Pitch.

I have contacted the Planning Department and Roads Section of Wexford County Council and no planning file is available for the construction of this bridge for public inspection.

Accordingly, could you please ask the CEO Eddie Taaffe, or the District Manager at the Borough Council meeting on Monday the 15th September 2025 precisely what planning permission is in place for this railway overbridge and confirm in what Council section/department the planning file can be inspected?

It is very important for the public record that firstly this question is asked and secondly that it is fully answered.

I note you sent my report to Eddie Taaffe on the 8th/9th July 2024 last year along with a request for an update on the Anne Street matter and I acknowledge receipt of Eddie Taaffe's reply to you, which I will address with you separately.

Yours Sincerely,

Martin Power
